

Develop

February – August 2021

Phase 1 – 100% complete

Phase 1 involved two key activities:

- ✓ developing the draft guidelines
- ✓ seeking input and feedback on the draft.

The results:

- ✓ individual hearing health care practitioners shared their diverse and practical experiences of teleaudiology to shape the initial draft
- ✓ more than 100 hearing health care practitioners, consumers and providers (77% participation rate) at 10 focus groups provided invaluable feedback
- ✓ written submissions from more than 30 organisations and individuals in Australia and overseas (50% response rate)
- ✓ more than 1150 downloads of the guidelines on the project website

Test

September 2021 – April 2022

Phase 2 – 100% complete

In this phase of the project, we:

- ✓ tested the revised draft guidelines with hearing health care practitioners
- ✓ informed stakeholders of the purpose of testing and how to provide feedback
- ✓ incorporated feedback from the testing process in the next version of the guidelines

Implement

From May 2022

Phase 3 – 100% complete

This phase will focus on:

- ✔ promoting
- ✔ implementing and
- ✔ embedding the guidelines.
