Phase 2: Testing
Stakeholder Social Content Kit

Teleaudiology Guidelines Phase 2: Testing Social Content Kit

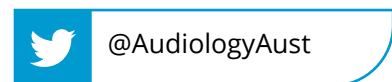

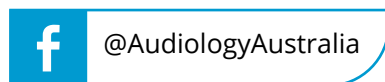

Audiology Australia is developing guidelines for hearing health care practitioners (Audiologists and Audiometrists) and hearing services providers to support the safe and effective delivery of hearing services through teleaudiology to all Australians.

We encourage your involvement in Phase 2: Testing to make sure our messages reach the right people who can support this important initiative.

How can you be involved?

- 1 Inform** your communities and/or members about testing the updated draft teleaudiology guidelines
- 2 Share** our resources to drive awareness of this project and its progress

Follow us on social media and share with your communities

Share our posts (below) and / or create your own posts

Remember to tag Audiology Australia @AudiologyAust and use our campaign hashtags so you can drive conversation.

POST	ARTWORK
<p> Audiology Australia is developing teleaudiology guidelines for hearing health care practitioners and hearing services providers.</p> <p>Consultation feedback to date highlighted four key findings</p> <ol style="list-style-type: none"> 1) the importance of client-centred care and the exercise of professional judgment 2) acknowledging that teleaudiology is a service delivery option for providers, practitioners and clients 3) the benefit of keeping guidelines broad to allow room for innovation 4) the guidelines need to complement and not replicate relevant guidance available elsewhere <p>The revised draft guidelines will be tested with practitioners and providers over the coming months.</p> <p>Read more about Audiology Australia's initial consultation and how to participate in the testing phase at www.teleaudiology.org.au.</p>	

<p> Testing Audiology Australia's draft teleaudiology guidelines is underway.</p> <p>Testing will involve interviews, focus groups and a survey. Results of each testing stage will progressively refine the guidelines to improve clarity, useability and relevance of the guidelines.</p> <p>You can be involved in the testing process. Simply visit www.teleaudiologyguidelines.org.au to hear more and send an expression of interest to teleguidelines@audiology.asn.au</p>	
---	---

<p> The testing phase of @AudiologyAust teleaudiology guidelines project is underway.</p> <p>Go to https://teleaudiologyguidelines.org.au/social-content-kit/ to read more and download the online resources to drive awareness of the project and its progress.</p>	
--	---

<p> @AudiologyAust draft teleaudiology guidelines are now being tested.</p> <p>Take a look at the FAQ's page here https://teleaudiologyguidelines.org.au/faqs/</p>
